**DUNS NUMBER:** 136482754

**CAGE CODE:** 43MP7

**NAICS CODES:** 541330 (Primary), 541511, 541512, 541513, 541715, 611430

**FACILITY CLEARANCE:** Top Secret

**CONTRACT VEHICLES:** Army ITES-3S (Sub), DLA JETS (Sub)

## COMPANY OVERVIEW

As a trusted systems integrator for more than 15 years, Strong Link Data (SLD) provides information technology (IT), systems engineering and professional services to customers in the defense, federal civilian government and commercial sectors. Headquartered in Springfield, Va., our company delivers IT enterprise solutions, manages large-scale, mission-critical IT programs and provides mission support services.

Strong Link Data specializes in supporting the security and resilience of our Nation's critical infrastructure – including assets, networks, and systems – that are vital to the public's confidence as well as the Nation's safety, prosperity, and well-being.

## DIFFERENTIATORS

### DEEP SUBJECT-MATTER EXPERTISE & EXPERIENCE

Committed to bringing unmatched expertise and leading edge thinking to our clients. Our clients receive experienced resources that can tailor solutions based on industry leading practices.

### STRATEGIC RESOURCING & OPERATIONAL EFFICIENCY

Our on demand strategic resourcing meets client requirements and provides direct senior leadership guidance from start to finish. We eliminate the unnecessary overhead from our cost structure and focus on efficient use of strategic resources.

### EXCELLENCE IN PERFORMANCE

We bring together talented and committed people with diverse perspectives -- people who can challenge one another's thinking, people who collectively approach problems from multiple points of view.

### **DOD JOINT SERVICE PROVIDER (JSP) STORAGE SERVICES**

Under this subcontract at the Pentagon, Strong Link Data (SLD) maintains, operates and upgrades a secure, complex, distributed information infrastructure to provide COOP and Continuity of Business (COB) to DoD Services and Agencies located within the Pentagon and the National Capital Region.

SLD provides clustering, recovery and storage services for **over 10 PB of storage**, including zero data loss real-time storage-based replication across all sites. The environment includes **over 2,000 physical and virtual servers**, running Windows, and multiple distributions of UNIX to include mainframe across all classification levels from unclassified to Top Secret/SCI. Through our ISO approach we consistently deliver on system availability exceeding the contract requirement of **99.96% uptime** for enterprise applications and storage services.

### **DEFENSE CONTINUITY INTEGRATED NETWORK (DCIN)**

Strong Link Data is part of a multi-disciplinary, multi corporate team tasked with a single architecture solution for Pentagon data protection.

#### **The Challenge:**

- Provide a unified means of off-site survivable storage for all Pentagon tenants.
- Provide a single network and storage platform that supports all Pentagon networks, servers, operating systems and applications.

#### **The Solution:**

- Application relocation capability such that a clustered application can operate out of multiple sites with a point-and-click interface.
- Private network designed with DISA to separate COOP data traffic from normal workload.
- Multiple off-site storage locations with dedicated servers and storage dedicated to data preservation.
- Byte-level data backup for all hardware, operating systems and applications.
- Real-time monitoring and testing of data replication.

#### **The Success:**

- Mission critical data backup is designed into every new system and application.
- Real-time monitoring prevents loss of any data.
- Standards and service level agreements provide users with guaranteed levels of service.
- Increased application up time due to the ability to operate at multiple sites.

### **DOD JOINT SERVICE PROVIDER (JSP) ENTERPRISE ENGINEERING WI-FI DEPLOYMENT**

Strong Link Data is part of a multi-disciplinary, multi corporate team tasked with a single architecture solution for Pentagon enterprise level accredited Wi-Fi service.

The JSPWIN Team deployed and expanded the Aruba Management infrastructure, providing a single operational interface for both the Pentagon's Wireless Intrusion Detection System (WIDS) and Wi-Fi Network. The JSPWIN Team completed the lifecycle replacement of approximately 1,800 legacy, End-of-Life, AirTight WIDS devices in the Pentagon with Aruba (hybrid, dual-function Wi-Fi/WIDS) access points. As a result, the JSPWIN Program has introduced a secure, wireless infrastructure available to support DoD NIPRNet communications, while also allowing for more scalable growth and the ability to potentially reduce costs significantly on hardware and infrastructure associated with wired networks.

### **HQMC PRODUCTION DEPLOYMENT SUSTAINMENT SUPPORT**

Under this subcontract at the Pentagon, Strong Link Data (SLD) provides assurance support, production troubleshooting support, maintenance release development and unit testing, maintenance release deployment and migration support, system monitoring, help desk operations, and software architecture and design input for a mission essential defense readiness application.
